Smoke emitted from one mosquito repellent coil is equivalent to those of 100 cigarettes, thus causing harm to a large number of people in India, an expert said Wednesday.

"Not many people know about it, but the damage done to your lungs by one mosquito coil is equivalent to the damage done by 100 cigarettes. This was according to a recent study conducted in Malaysia," said Chest Research Foundation director Sandeep Salvi.

A glowing green mosquito coil, coiled in a spiral shape, emitting a soft green light. It is set against a dark background.
